l. This o	pinion contains indi	cations relati	ing to the following items	:					
\boxtimes	Box No. I	Basis of the o	pinion						
\boxtimes	Box No. II	Priority							
	Box No. III	Non-establish	hment of opinion with reg	ard to novelty, inventiv	ve step and industrial applicability				
	_		of invention						
\boxtimes	Box No. V	Reasoned stat pplicability;	tement under Rule 43bis. citations and explanation	.1(a)(i) with regard to novelty, inventive step or industrial ns supporting such statement					
		Certain docur							
	Box No. VII	Certain defec	ts in the international app	lication					
	Box No. VIII C	Certain obser	vations on the internation	al application					
2. FURT	HER ACTION								
If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority of than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions this International Searching Authority will not be so considered.									
PCT/IS	If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.								
ror turi	her options, see For	m PC1/ISA/

В	ox No. 1	Basis of this opinion
1.	Witl	n regard to the language, this opinion has been established on the basis of the international application in the language in which it w l, unless otherwise indicated under this item.
ĺ		This opinion has been established on the basis of a translation from the original language into the following language
		, which is the language of a translation furnished for the purposes of international search (unde
		Rule 12.3 and 23.1(b)).
2.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimention, this opinion has been established on the basis of:
	a.	type of material
		a sequence listing
		table(s) related to the sequence listing
	b.	format of material
		in written format
		in computer readable form
	l	
	c.	time of filing/furnishing
	ļ	contained in the international application as filed.
	L	filed together with the international application in computer readable form.
	[furnished subsequently to this Authority for the purposes of search.
4.	1	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Box	No. II	Priority						
1.	⊠ Th	ne following document has not yet been furnished:						
	\boxtimes	copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).						
		translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).						
	Cor the	nsequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on assumption that the relevant date in the claimed priority date.						
2.	— (R	This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.						
3.	Addition	al observations, if necessary:

 - D2: HUBERT, VAN MOOK ET ALL: "Linux Advanced Routing and Traffic control" INTERNET PUBLICATION [Online] 22 July 2002 (2002-07-22), XP002255410 Extract from the Internet: URL:www.tldp.org/HOWTO/adv-routing-HOWTO/>; [extracted on 23 September 2003]
 - The slight lack of clarity regarding the definition and the management of the N levels of tokens of the multilevel bucket make it possible to consider Hierarchical Token Bucket (HTB) as in D1 or D2 or else the more conventional Weighted Round Robin (WRR) applied to a Token Bucket Filter as very similar to claim 1 (and the corresponding claims 14,

International application No.
PCT/FR2004/000955

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

15, 18 in other categories) thereby implying that claims 1, 14, 15 and 18 do not satisfy the requirements of the PCT as regards inventive step (PCT Article 33 (3)).

In particular the quanta associated with the WRR or with the Deficit Round Robin or the bandwidth levels of the classes of the HTB may be likened to the insufficiently defined tokens of claim 1, the said tokens contained in the memories to allow the sending of packets, likewise for the action of borrowing tokens from other priority levels is a known choice for allowing the traffic classes of higher priorities to comply with their timing constraints.

Nevertheless, the description ought to make it possible to define the role of the tokens, the borrowing function and the management of the N levels of tokens in such a way that the contribution of the invention as compared with HTB will become clear and not derivable from the prior art.

Remark concerning the cited document L:

Document L cited has unfortunately no publication date or year of copyright but is very useful for understanding HTB in particular it makes it possible to summarize what HTB represents (succession of token buckets organized in classes of various priorities).
